Subject: Re: briefing on the TSCA SACC

This is really good but we need to be able to also highlight how that this important faca committee is just another example of how we are implementing the Lautenberg law. Hitting deadlines. Establishing fees. Risk evals for the first 10 and NOW establishing this committee how it should have been including stakeholders like the environmental defense fund and others to implement the new rigorous scientific requirements congress specifically laid out in the Lautenberg law. This can be planted really well.

Hayley/Ryan,

We are ready to move forward a package to the Administrator that will expand the TSCA required FACA Advisory committee from 18 members to 29 members (its called the Science Advisory Committee on Chemicals- the SACC). When the committee was formed in January 2017, it did not include some of the TSCA required member groups (labor, public health, nor did it include industry representatives from chemical manufacturing and processing).

This will be a very important FACA committee and as required by TSCA we will be using this group instead of an SAB panel or subgroup (as the IRIS program uses). This is a stand alone and is required in section 26 of the Lautenberg Amendments.

As we are close to needing signature, we would like to provide a briefing to the Administrator.

Ryan- please let me know if you want a pre-brief in advance.

Richard- looping you in for awareness.

Please let me know if there are questions.

Thanks,

Nancy
